ABOUT

Interdisciplinary educator and digital designer with experience leading creative and technical learning environments. Skilled in curriculum design, community programming, and managing collaborative projects that bridge art, technology, and education. Passionate about expanding access to creative tools and building inclusive spaces where students and artists can develop technical skills and expressive practices.

EXPERIENCE

Virtual Experiences Educator

Game-U

Remote // April 2023 - Current

Facilitated education for students nationwide as a Hybrid+ Curriculum educator interfaced with teachers and school boards for Hybrid+ and parents in 1-on-1 setting to ensure outcomes. Designing personalized curriculum for private clients and partner organizations specializing in Python, Scratch, Unity, and Roblox Studio. Creating computer science modules covering object-oriented programming, functions, and algorithms.

Brand Development Director

Urban League of Essex County

Newark, NJ // March 2025 - August 2025

Helped establish "Tech House" for Urban League of Essex with former Newark councilman Darrin Sharif to empower underserved communities in Essex County. Developed branding and advertisement material while promoting classes through professional outreach. Delivered curriculum on personal branding and promotional tools for independent business owners.

Digital Designer

Freelance

Sparta, NJ // May 2020 - Current

Collaborated with artists, companies, and conferences to deliver digital visual content, Picatinny Arsenal, and largest video game conference Magfest. Responsible for the creation and oversight of social media marketing and distribution of promotional materials for live events. Produced live visuals at Jungle Gym 2023, featuring 8 international artists who had 50M+ views on Spotify. Featured on Pitchfork for Pride music festival held at NYC Resistor, a shared community space providing resources to NYC creatives.

Computer Science Contractor

Picatinny Arsenal

Rockaway, NJ // July 2017 - Sept 2022

Worked for Picatinny Arsenal as part of the Army Education Outreach Program. Seasonal internship placed on different development teams on post. Implemented project goals for Gaming, Interactive Technologies, Multimedia (GITM), updating legacy code in Ruby on Rails and JavaScript. Tester on a modular video game, generating and reviewing builds for developers, stakeholders, as well as executing test plans and test cases.

ACHIEVEMENTS

Bachelors of Science

Business and Information Systems

New Jersey Institute of Technology // 2022

Graduated class of 2022

Member of NJIT division National Society of Black Engineers

Member of NJIT Black Engineering Technology Alumni Association
